

# Survey In Epigenetics

Spring Semester

## Course Description:

This 3 credit course introduces **graduate students** to the various areas of epigenomics and the research concerning epigenetics in eukaryotes (with special emphasis on mammals). The course is designed to be a combination of lectures, paper discussions, and research talks by invited faculty speakers working on epigenetics. Course number AnSci 8415. This class has traditionally been taught on MWF at 2:00pm. However, it is possible to change the time to accommodate those interested in the course.
